# Help students participate, learn and communicate

---

ILC Tech has been the leading provider of information and advice about assistive technologies (AT) for communication and learning in WA for over 20 years.

Our speech pathologists and occupational therapists are respected for their experience, knowledge and skill working with the latest assistive technology and communication aids.

We are able to assess, implement and support technology in your school to help your students to participate, learn and communicate to the best of their ability.

The ILC Tech team will determine the most suitable communication and AT options for your classrooms and students and ensure staff are skilled and confident to use the technology.

***“The model of having speech pathologists working alongside teachers and education assistants with students is ground breaking. The ILC Tech team have helped teachers change the way they teach, education assistants to become expert AAC users and, most importantly, children to make comments, requests and statements for the very first time”***

*Linda Lane, Principal, Cloverdale Education Support Centre*

# ILC Tech school packages

---

The ILC Tech team aims to understand your current priorities, resources and skills to build a tailored training and support package to meet your school's needs.

Our team can offer classroom or whole school consultation and professional development in the areas of:

- Augmentative and alternative communication (AAC). For example, communication methods and devices for students with complex communication needs.
- Assistive Learning Technology. For example, iPads and apps.
- Literacy Support Technology. For example, screen reading and word prediction software and apps.

## ILC Tech can offer your school:

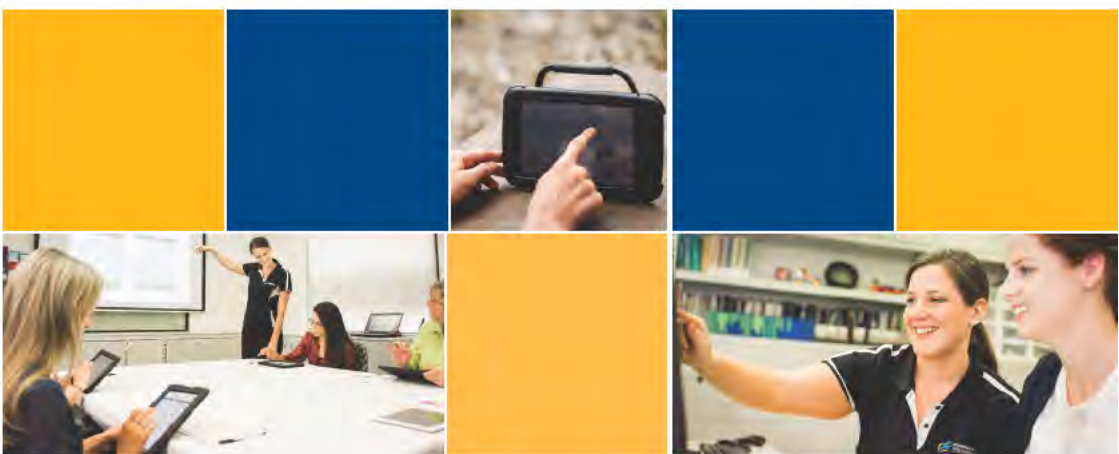

- Free initial consultation to determine your school's priorities and goals
- Intensive service delivery model
- Classroom and/or individual student goal setting
- Pre and post assessment with evaluation and reporting of outcomes
- Within classroom support working alongside your school team
- Link your staff professional development with in classroom implementation
- Support staff to integrate communication and AT into the curriculum

***“It was a fantastic experience having Amy in my classroom, she worked so well with my student and was able to trial different strategies on him directly with what I was teaching to the class”***

*Alana Di Labio, Year 1 Teacher, Noranda Primary School*
